Design Roland Meyer-Brühl

Designpreis Baden-Württemberg

Dynamic look: tam is a récamier with a casual, agile charm, confidently stylish in terms of both design and functionality, and at the same time a relaxed oasis of calm for leisure times. The back and side rest elements can be lowered flexibly, the side rest element can also be pulled towards the front. Each rest element is perfected by a large side cushion. tam is equipped with removable and exchangeable covers, and easily movable thanks to castors at the head end. Bottom right: a second side rest element turns the récamier into an open-end – which it can also easily be combined with. Top left: two récamiers can be used to create a double bed with a sleeping area measuring 150 x 192cm.

Pure softness: combining a récamier with an open-end creates a versatile, cosy corner suite with rest elements that can be lowered fully. On request, also available with additional headrests. Top left: corner arrangement created

with two récamiers. Top right: two open-ends and matching stool create an inviting relaxation area with a maximum of flexibility.
